

SH 46 From Bulverde Road to FM 3159

CSJ: 0215-07-027 & 0215-01-044

The Texas Department of Transportation (TxDOT) in cooperation with the City of Bulverde and Comal County is beginning a study for improvements to SH 46 from Bulverde Road to FM 3159 (Smithson Valley Road). The project is being developed to address safety and mobility concerns in this rapidly growing area of Bulverde. We have identified you as someone who is in the area and interested in the project. We hope you find this information informative and that you will share it with others that may be interested.

Project Details

The project area includes approximately seven miles of SH 46 from Bulverde Road to Smithson Valley Road. Proposed improvements may include expansion of the roadway from four to six lanes in certain areas, depending on the results of new traffic studies. Improvements will include pedestrian and bicycle accommodations.

Project Development Process

TxDOT values the delivery of safe, efficient transportation projects and makes sound decisions based on the balanced consideration of transportation needs and of social, economic, and environmental impacts of proposed transportation improvements. Over the next few months, the project engineering team will study the project area including land surveys, traffic studies, crash and other safety information, water quality and drainage needs, and impacts to the public and environment. Then the team will develop a reasonable range of alternative design solutions and will continue studying and refining those into a preferred solution.

Surveying to Begin

The project team is currently working on data collection for the project. Over the next few weeks, project team members will begin surveying the land and conducting an in depth tree survey in the project area. There will be no road closures needed for this work, but you may see flagging operations during their set up.

Public Involvement

TxDOT is committed to working closely with the community on this project. We will continue to send you updates as they are available. We will also hold a public meeting to share project details and the results of initial studies, and collect input in early 2016. Meeting details will be shared as they become available. Please contact us at any time with questions or comments.

Project Updates

We will continue to send email updates on this project. If you did not received this message directly and are interested in receiving project updates, please send an email to: sh46info@gmail.com with "Updates" in the subject line.
